SLING hanging chair - debossed GEOMETRIC (deconstructed Giraffe)

Our products are hand-made using genuine leather of the highest quality. The beauty of leather is that each hide has natural markings and features, which means that each piece is unique, with its own personality.

Colour, engravings and patterns are added by hand, embracing the characteristics and individuality of the hide. The craftsmanship and skill of the artist's hand therefore constitutes an inherent part of the making of your particular piece, a feature we celebrate as part of the creative process. Debossing will also vary and each piece will be unique. There might also be slight colour variations in the leather piece to piece. It depends what leather is available from the tannery and we select the best pieces according to colour, texture and smoothness.

As you live with your product, the leather will evolve. With the correct care, the appearance of your newly-purchased piece will retain its beauty, developing its own character and patina.

Notes for Leather Care

A regular wipe with a soft, damp (never wet) cloth will lift dust from the pores of your leather product, allowing the leather to breathe and rewarding you with many years of excellent service.

- Place in direct sunlight for about 20 minutes if possible.
- Wipe with a warm (not hot) clean damp, soft cloth. Do not allow the leather to become wet.
- Once completely dry, use a reputable leather hide food, applied to both sides of the leather.
- Allow your leather to relax with the hide food for a few minutes, before buffing with a clean, soft cloth.
- Avoid direct exposure to sun for extended periods of time. (The leather wouldn't like it any more than your skin would!)
- Avoid contact with hot liquids.
- Avoid contact with strong chemicals eg. acetone and methylated spirits. Never use detergents, soaps, all-purpose cleaners or solvents when cleaning, as they contain chemicals harmful to leather.
- Avoid exposure to damp conditions for extended periods of time.
- Avoid using a wet cloth and using any type of abrasive product on your leather.

a bit about the team

Joanina - designer:

A design and advertising guru as it were, Joanina is one of a kind, full house. Having earned her position as Head of Creative at LOWE Cross Colours she has proved herself numerous times, with many local and international awards as evidence and is very proud to have won a sought after D&AD Pencil. Joanina sat on the judging panels of both local and international award ceremonies including the highly prestigious Cannes Advertising Festival, the New York Festivals, Dubai Lynx, A Award, Loeries and was the President of the Design Category for the London International Awards.

Innovation and audaciousness are part of her character, always challenging the norms and finding creative solutions that enhance the identity and personality of a brand. Highly energetic, she loves to devour all forms of visual communication and is a keen observer of the latest trends. She has always had a love for beautiful objects and is now focusing on designing hanging furniture - a passion that she has had for a long time. She can fondly remember coming back from a trip to London once with a hanging chair in tow. She supplies discerning clients and selective stores all over the world.

David - photographer and curious wannabe inventor

Starting out as a husband and wife team was definitely a double whammy! David being a photographer, certainly had an eye - and an aesthetic one at that. He enjoyed extending his talent into creating three dimensional objects. He was down to earth and practical which was a definite plus and as he was certainly more than 'handy' assisted technically. On occasion even had to dig deep to find some of that Boy Scout training in figuring out the tying of some of the specialised knots needed in the rope for the hanging the models. It was huge fun to work together on some of the more challenging pieces. David passed away in 2017 but left the business in a stable condition with the existing range well in place. His photography partner is now continuing doing the photographic work and and the metal work team is well entrenched and in place. The business is continuing and going from strength to strength despite the crucial loss. We are grateful for the input and care he generously shared in the business.
